THE COLLECTION

The museum and the collection inside have been put together by the enthusiastic volunteers at **Ferroclub Cuneese**, a cultural association for the restoration and promotion of railway heritage, particularly at local level. Over the years, volunteers have collected the objects, rolling stock and personal accounts that today make up the collection you can see in the museum. Since 2015, thanks to the premises provided by **Robilante Municipal Council** and **Rete Ferroviaria Italiana** (the Italian Railway Network), Ferroclub has been able to organise and showcase this heritage, creating an exhibition route redesigned and expanded in 2026 thanks to **the Interreg Alcotra cooperation project "Vermenagna-Roya III"**.
Today, the Piccolo Museo del Treno is a vibrant space to explore and experience, where **machinery, tools and artefacts once again bring the railway to life through their workings and the stories of those who used them.**

PICCOLO MUSEO DEL TRENO

ROBILANTE

COME ON BOARD: SET OFF ON A JOURNEY THROUGH THE WORLD OF RAILWAYS

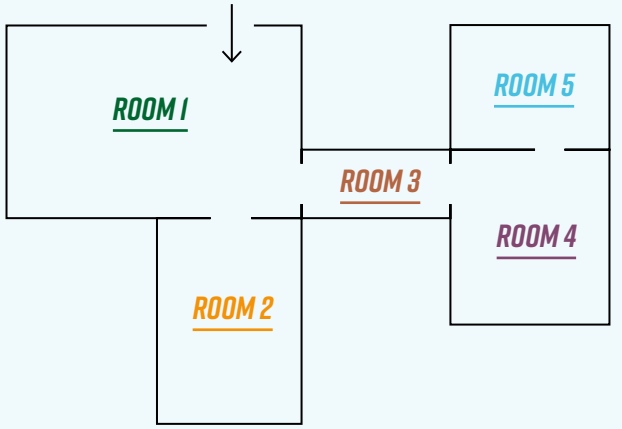

and discover the history of the Cuneo–Ventimiglia–Nice line.

Vintage rolling stock, artefacts, images, videos, scale models and interactive displays illustrate how trains and travel have changed. Find out how a railway station works, take a virtual journey across the Alps on one of Europe's most spectacular railway lines and, at the end of the journey, use the simulator to try your hand at driving a train.

THE ROUTE

ROOM 1 / THE RAILWAY

The large, three-level model and the replica of the Limone Piemonte station illustrate the complex world of railways, while a timeline traces the history of the Cuneo–Ventimiglia–Nice line.

ROOM 2 / THE STATION

Step into the heart of the station and take on the role of stationmaster: operate points and signals and observe the working exhibits that show how railway safety and traffic management have changed.

ROOM 3 / ALL ON BOARD!

Walk through the tunnel and discover the incredible engineering of the Cuneo–Ventimiglia–Nice: a railway line that crosses the Alps all the way to the Mediterranean, with tunnels, bridges, viaducts and helical tunnels.

ROOM 4 / ON THE TRAIN

Discover the train from the perspective of passengers, crew and train drivers, thanks to period furnishings, railway equipment and signals. A video and a digital archive enhance the experience.

ROOM 5 / THE SIMULATOR

Step into the driver's cab and try your hand at driving a train along the Cuneo–Ventimiglia–Nice route: control the speed and signals using the simulator and take a look at the original driver's desks in the locomotives.
